PROFESSIONAL SUMMARY

QA Automation Engineer / SDET with 2.9 years of experience in manual and automation testing of web applications. Skilled in building scalable PyTest automation frameworks using Selenium WebDriver (Python) with Page Object Model (POM). Experienced in REST API testing with Postman, CI/CD integration with Jenkins, SQL validation, and defect lifecycle management in Jira. Reduced regression execution effort by ~60% through automation. ISTQB Foundation and AWS Cloud Practitioner certified.

TECHNICAL SKILLS

Languages:	Python, SQL
Automation:	Selenium WebDriver, PyTest, Page Object Model (POM), Data-Driven & Keyword-Driven Frameworks, Playwright (learning)
API Testing:	REST API, Postman (status codes, JSON schema / payload validation, error handling)
CI/CD & Tools:	Jenkins, Git, GitHub, AWS, Linux
Test Mgmt:	Jira, HTML Reports (pytest-html)
Testing Types:	Functional, Regression, Sanity, End-to-End, Integration, Cross-Browser, Production Validation (PVT)
Methodologies:	Agile (Scrum), SDLC, STLC, Defect Life Cycle

PROFESSIONAL EXPERIENCE

Test Automation Engineer | Tech Mahindra

Client: Rogers Communications | Sep 2023 - Present | Tiruppur, India

- Built and maintained a PyTest regression automation suite using Page Object Model (POM), automating 200+ test cases and reducing manual regression effort by ~60% across release cycles.
- Developed Selenium WebDriver (Python) automation scripts to validate web applications, improving execution speed and ensuring consistent coverage across core modules.
- Performed REST API testing using Postman - created and executed requests, validated JSON payloads and HTTP status codes, and tested error-handling scenarios for service APIs.
- Designed and executed End-to-End (E2E) test scenarios covering complete workflows across provisioning, billing, and account management modules.
- Integrated automated regression suites into Jenkins CI/CD pipelines for continuous testing and faster feedback on every build and deployment.
- Analyzed application logs on AWS to debug failed test scenarios and support production issue analysis.
- Executed Production Validation Testing (PVT) after each deployment to confirm release stability in the production environment.
- Managed the full defect lifecycle in Jira - logged defects with clear reproduction steps, severity, and screenshots, and collaborated with developers to track and verify fixes.
- Performed cross-browser testing across Chrome, Firefox, and Edge to ensure consistent application behaviour.
- Participated in Agile Scrum ceremonies - sprint planning, daily stand-ups, and retrospectives - sharing testing updates and effort estimates.

PROJECTS

Hybrid UI Automation Framework - Selenium + Python (PyTest, POM)

github.com/ramprasath272501/Testing_project

- Open-source UI automation framework with POM architecture, explicit waits, data-driven tests, screenshot-on-failure reporting, and a GitHub Actions CI pipeline that runs the suite on every push.

EDUCATION

- Master of Computer Applications (MCA) - Kalasalingam University | Expected 2026 | CGPA: 8.0
- B.Sc. Computer Technology - Dr. N.G.P Arts and Science College | 2019 - 2022 | CGPA: 7.5

CERTIFICATIONS & ACHIEVEMENTS

- ISTQB Foundation Level - International Software Testing Qualifications Board
- AWS Certified Cloud Practitioner - Amazon Web Services
- Bravo Award (Tech Mahindra) - Recognized for contribution to testing quality during application releases.
